

Computer System Requirements

The Avalon Bookings Manger program will run on any reasonable specification PC or PC Local Area Network under the Windows (tm) operating system.

It will run under Windows XP, Windows Vista or Windows 7

We recommend that the PC has MS Word and Excel installed as Bookings Manager can export data into both of these programs to provide additional functionality and reporting.

NB The program cannot interface with Open Office or Microsoft Works

If the program is run on a local area network we recommend that limit of 5 concurrent PCs if each is to be used to concurrently enter data.

NB We do have some customers with as many as Nine PCs running Bookings Manager, but where the majority of these are only used for occasional enquiry purposes. Consequently there is not a major demand on the database.

If you would like to discuss your requirements in this area please contact us on either 08454 30 22 33 or our help line 0330 999 0125

Bookings Manager has been installed and runs very successfully on a Citrix network.

Other Possibilities

Bookings Manager has been installed in “Cloud “environment. We have no expertise in this area but if you are considering this route we are happy to speak with your Cloud supplier and to provide a copy of the program for evaluation

Limitations

Bookings Manager cannot be run on MAC equipment.

It cannot be run as a web hosted system
